

Social Media - Instagram

Use the template below to create your very own Instagram post! Remember to include all the different parts of the post that are labeled and draw what you want your picture to look like!

The template is a vertical rectangle representing an Instagram post. It is divided into several sections:

- Top Header:** Contains a circular profile picture placeholder on the left, a horizontal line for the Instagram handle in the center, and the Instagram camera icon on the right.
- Main Content Area:** A large empty rectangular space for drawing the main image of the post.
- Bottom Interaction Bar:** Contains icons for a heart (likes), a speech bubble (comments), a paper plane (share), and a bookmark (save). Below these icons is a line of text that says "Liked by ja_swo and others".

Green arrows point from text labels to their corresponding parts in the template:

- Profile Picture:** Points to the circular profile picture placeholder.
- Instagram Handle (what people search for!):** Points to the horizontal line for the handle.
- Picture (what will come up on people's feeds and what will draw them to buy your product!):** Points to the large main content area.
- Caption (gives people all the information that they need!):** Points to the bottom interaction bar.

Below the caption label, there is a separate box with the text: "Will hashtags help you get engagement? #TacoTuesday".
